Embodied Food Politics Michael S. Carolan

2016-04-29 While the phenomenon of embodied knowledge is becoming integrated into the social sciences, critical geography, and feminist research agendas it continues to be largely ignored by agro-food scholars. This book helps fill this void by inserting into the food literature living, feeling, sensing bodies and will be of interest to food scholars as well as those more generally interested in the phenomenon known as embodied realism. This book is about the materializations of food politics; "materializations", in this case, referring to our embodied, sensuous, and physical connectivities to food production and

consumption. It is through these materializations, argues Carolan, that we know food (and the food system more generally), others and ourselves.

Tomorrow in the Battle Think on Me Javier

Marías 2012-08-02 Tomorrow in the Battle Think on Me is a gripping and moving meditation on the hold that the dead have over the living, by Javier Marías, whose highly-anticipated new novel The Infatuations is published in 2013. Víctor, a ghostwriter, is just about to have an affair with Marta, a married woman, when - in the bedroom, half-undressed - she drops dead in his arms. He panics and slips away. But Marta's family are all

too aware that she was not alone when she died, and Deán, the widowed husband, is determined to find out who was sharing her bed that night. Víctor, accustomed to a life of pretending, finds that he cannot live in the shadows forever.

Political Economy of Post-apartheid South Africa Gumede, Vusi 2017-05-05 The book, made up of three parts, covers a wide spectrum of political economy issues on post-apartheid South Africa. Although the text is mainly descriptive, to explain

various areas of the political economy of post-apartheid South Africa, the first and the last parts provide illuminating insights on the kind of society that is emerging during the twenty-one years of democracy in the country. The book discusses important aspects of the political history of apartheid South Africa and the evolution of post-apartheid society, including an important recap of the history of southern Africa before colonialism. The text is a comprehensive description of numerous political economy phenomena since South Africa gained its political independence and covers some important themes that have not

been discussed in detail in other publications on post-apartheid South Africa. The book also updates earlier work of the author on policy and law making, land and agriculture, education and training as well as on poverty and inequality in post-apartheid South Africa thereby providing a wide-ranging overview of the socio-economic development approaches followed by the successive post-apartheid administrations. Interestingly, three chapters focus on various aspects of the post-apartheid South African economy: economic policies, economic empowerment and industrial development.

Through the lens of the notion of democratic developmental state and taking apartheid colonialism as a point of departure, the book suggests that, so far, post-apartheid South Africa has mixed socio-economic progress. The author's extensive experience in the South African government ensures that the book has policy relevance while it is also theoretically sound. The text is useful for anyone who wants to understand the totality of the policies and legislation as well as the political economy interventions pursued since 1994 by the South African Government.

Mothers Who Think Kate Moses 2013-08-07 From the editors of the cutting-edge online magazine Salon come provocative essays that take an unflinching look at the gritty truths and unreserved pleasures of contemporary motherhood. **Mothers Who Think: Tales of Real-Life Parenthood**, which grew out of Salon's popular daily department of the same name, comprises nearly forty essays by writers grappling with the new and compelling ideas that motherhood has dangled before them. Elevating the discussion of motherhood above the

level of tantrum control and potty training, this collection covers an unparalleled range of topics, from the impossibility of loving your children equally to raising a son without a father, from worrying that your privileged black child is becoming too "white" to the free-floating anger most mothers feel but wouldn't dare admit--except to other mothers. The intelligent, candid essays in Mothers Who Think are a testament to the notion that motherhood gives women more to think about, not less. Coeditors Camille Peri and Kate Moses have assembled the best writing from the website's first two years, including works by

"Mothers Who Think" regulars Anne Lamott, Chitra Divakaruni, Susie Bright, and Stephanie Coontz; eloquent new essays by Jayne Anne Phillips, Sallie Tisdale, Susan Straight, Jane Lazarre, Nora Okja Keller, Beth Kephart, Ariel Gore, and Alex Witchel; and more than a dozen un-forgettable new voices. Irreverent, wistful, hilarious, fierce, tender, these essays offer an unsparing look at the myths and realities, serious and silly sides, and thankless and supremely satisfying aspects of being a mother. Nutrition and Health in Developing Countries

Richard David Semba 2008-06-26 This updated and expanded book was written with the

underlying conviction that global health and nutrition problems can only be solved through a firm understanding of the different levels of causality and the interactions between the various determinants. This volume provides policy makers, nutritionists, students, scientists, and professionals with the most recent and up-to-date knowledge regarding major health and nutritional problems in developing countries.

Radical Medicine Louisa L. Williams 2011-07-12

A “radical” approach to holistic healing that examines the root causes and cures for ailments such as Alzheimer’s disease, breast cancer, and

heart attacks • Offers cutting-edge detoxification and draining therapies to address the tremendous chemical onslaught of modern life • Explains the profound health problems caused by dental amalgams, vaccinations, antibiotics, cosmetics

With the historic use of toxic mercury amalgam fillings, excessive courses of antibiotics, damaging childhood vaccines, and the many industrial pollutants and chemicals that have been spread into our air, water, and food over the past century, general holistic health guidelines are simply no longer adequate for most people. Only through radical measures--that is, getting to the

true root or underlying cause of disease--can effective healing occur. In *Radical Medicine*, naturopathic physician Louisa Williams describes how to treat these and other modern-day “obstacles to cure,” in order to ensure against future degenerative disease and achieve the optimal health that is our birthright. Examining the many health problems triggered by dental amalgams and poor dentistry, Dr. Williams explains that our teeth are focal points for health issues that arise elsewhere in the body. She explores the impact of vaccinations, the excessive use of antibiotics, and the chemical-laden

products used as health and beauty aids--which are linked to Alzheimer's disease, heart attacks, and breast and other cancers--and provides information on cutting-edge detoxification treatments as well as drainage and nutritional therapies. A practical guide for practitioners and patients alike, Radical Medicine offers a wealth of holistic, natural therapies for overcoming what is poisoning us and our world so we can achieve optimal health and well-being.

Pathogenesis of Periodontal Diseases Nagihan Bostanci 2017-09-25 This book aims to provide clinicians with a refined understanding of the biology that underlies periodontal diseases,

thereby offering a sound basis for improved clinical decision making with regard to prevention strategies, diagnosis, and therapy. All significant aspects of periodontal pathogenesis are covered, including the roles played by the oral microbiome and biofilms, bacterial virulence factors, cells of the immune system, matrix metalloproteinases, proinflammatory and osteolytic cytokines, genetic factors, and antimicrobial peptides. Periodontal diseases are among the most common infectious diseases in humans, and the primary cause of tooth loss in adults. The functional and esthetic problems associated with these diseases

compromise quality of life, and their treatment imposes large financial burdens on national health systems and private patients. Up-to-date knowledge of periodontal pathogenesis is therefore essential for the contemporary clinician. This book, written by experts from Europe and the Americas, delivers such knowledge in an accessible, clinician-friendly way.

What's the Matter with Kansas? Thomas Frank
2007-04-01 One of "our most insightful social observers"* cracks the great political mystery of our time: how conservatism, once a marker of class privilege, became the creed of millions of

ordinary Americans With his acclaimed wit and acuity, Thomas Frank turns his eye on what he calls the "thirty-year backlash"—the populist revolt against a supposedly liberal establishment. The high point of that backlash is the Republican Party's success in building the most unnatural of alliances: between blue-collar Midwesterners and Wall Street business interests, workers and bosses, populists and right-wingers. In asking "what 's the matter with Kansas?"—how a place famous for its radicalism became one of the most conservative states in the union—Frank, a native Kansan and onetime Republican, seeks to

answer some broader American riddles: Why do so many of us vote against our economic interests? Where's the outrage at corporate manipulators? And whatever happened to middle-American progressivism? The questions are urgent as well as provocative. Frank answers them by examining pop conservatism—the bestsellers, the radio talk shows, the vicious political combat—and showing how our long culture wars have left us with an electorate far more concerned with their leaders' "values" and down-home qualities than with their stands on hard questions of policy. A brilliant analysis—and

funny to boot—What's the Matter with Kansas?
presents a critical assessment of who we are,
while telling a remarkable story of how a group of
frat boys, lawyers, and CEOs came to convince a
nation that they spoke on behalf of the People.

All Souls Javier Marías 2013-04-23 By one of the
most important voices in contemporary world
literature, a darkly comic novel about that most
British of institutions, Oxford University. In *All
Souls*, a visiting Spanish lecturer, viewing Oxford
through a prismatic detachment, is alternately
amused, puzzled, delighted, and disgusted by its

vagaries of human vanity. A bit lonely, not always
able to see his charming but very married
mistress, he casts about for activity; he barely
has to teach. Yet so much goes into simply
"being" at Oxford: friendship, opinion-mongering,
one-upmanship, finicky exchanges of favors,
gossip, adultery, book-collecting, back-patting,
backstabbing. Marías demonstrates a sweet tooth
for eccentricity in this sly campus novel and love
story.

Remittance Income and Social Resilience among

Migrant Households in Rural Bangladesh

Mohammad Jalal Uddin Sikder 2017-09-30 This book examines how migrant remittances contribute to household social resilience in rural Bangladesh. Using a mixed methods approach, the authors show that remittances play a crucial role in enhancing the life chances and economic livelihoods of rural households, and that remittance income enables households to overcome immediate pressures, adapt to economic and environmental change, build economic and cultural capital, and provide greater certainty in planning for the future. However, the

book also reveals that the social and economic benefits of remittances are not experienced equally by all households. Rural village households endure a precarious existence and the potentially positive outcomes of remittances can easily be undermined by a range of external and household-specific factors leading to few, if any, benefits in terms of household social resilience.

Your Guide to Lowering Your Blood Pressure with

Dash U. S. Department Human Services

2012-07-09 This book by the National Institutes of

Health (Publication 06-4082) and the National Heart, Lung, and Blood Institute provides information and effective ways to work with your diet because what you choose to eat affects your chances of developing high blood pressure, or hypertension (the medical term). Recent studies show that blood pressure can be lowered by following the Dietary Approaches to Stop Hypertension (DASH) eating plan-and by eating less salt, also called sodium. While each step alone lowers blood pressure, the combination of the eating plan and a reduced sodium intake gives the biggest benefit and may help prevent

the development of high blood pressure. This book, based on the DASH research findings, tells how to follow the DASH eating plan and reduce the amount of sodium you consume. It offers tips on how to start and stay on the eating plan, as well as a week of menus and some recipes. The menus and recipes are given for two levels of daily sodium consumption-2,300 and 1,500 milligrams per day. Twenty-three hundred milligrams is the highest level considered acceptable by the National High Blood Pressure Education Program. It is also the highest amount recommended for healthy Americans by the 2005

"U.S. Dietary Guidelines for Americans." The 1,500 milligram level can lower blood pressure further and more recently is the amount recommended by the Institute of Medicine as an adequate intake level and one that most people should try to achieve. The lower your salt intake is, the lower your blood pressure. Studies have found that the DASH menus containing 2,300 milligrams of sodium can lower blood pressure and that an even lower level of sodium, 1,500 milligrams, can further reduce blood pressure. All the menus are lower in sodium than what adults in the United States currently eat-about 4,200

milligrams per day in men and 3,300 milligrams per day in women. Those with high blood pressure and prehypertension may benefit especially from following the DASH eating plan and reducing their sodium intake.

Climate Change, Vulnerability and Migration S. Irudaya Rajan 2017-09-22 This book highlights how climate change has affected migration in the Indian subcontinent. Drawing on field research, it argues that extreme weather events such as floods, droughts, cyclones, cloudbursts as well as sea-level rise, desertification and declining crop productivity have shown higher frequency in

recent times and have depleted bio-physical diversity and the capacity of the ecosystem to provide food and livelihood security. The volume shows how the socio-economically poor are worst affected in these circumstances and resort to migration to survive. The essays in the volume study the role of remittances sent by migrants to their families in environmentally fragile zones in providing an important cushion and adaptation capabilities to cope with extreme weather events. The book looks at the socio-economic and political drivers of migration, different forms of mobility, mortality and morbidity levels in the

affected population, and discusses mitigation and adaptation strategies. The volume will be of great interest to scholars and researchers of environment and ecology, migration and diaspora studies, development studies, sociology and social anthropology, governance and public policy, and politics.

Accelerating Poverty Reduction in Africa Kathleen Beegle 2019-10-09 Sub-Saharan Africa's turnaround over the past couple of decades has been dramatic. After many years in decline, the continent's economy picked up in the mid-1990s. Along with this macroeconomic growth, people became healthier, many more youngsters

attended schools, and the rate of extreme poverty declined from 54 percent in 1990 to 41 percent in 2015. Political and social freedoms expanded, and gender equality advanced. Conflict in the region also subsided, although it still claims thousands of civilian lives in some countries and still drives pressing numbers of displaced persons. Despite Africa's widespread economic and social welfare accomplishments, the region's challenges remain daunting: Economic growth has slowed in recent years. Poverty rates in many countries are the highest in the world. And notably, the number of poor in Africa is rising

because of population growth. From a global perspective, the biggest concentration of poverty has shifted from South Asia to Africa. Accelerating Poverty Reduction in Africa explores critical policy entry points to address the demographic, societal, and political drivers of poverty; improve income-earning opportunities both on and off the farm; and better mobilize resources for the poor. It looks beyond macroeconomic stability and growth—critical yet insufficient components of these objectives—to ask what more could be done and where policy makers should focus their attention to speed up

poverty reduction. The pro-poor policy agenda advanced in this volume requires not only economic growth where the poor work and live, but also mitigation of the many risks to which African households are exposed. As such, this report takes a "jobs" lens to its task. It focuses squarely on the productivity and livelihoods of the poor and vulnerable—that is, what it will take to increase their earnings. Finally, it presents a road map for financing the poverty and development agenda.

The Management of Gallstone Disease Michael R. Cox 2018-05-24 This book looks at the

comprehensive management of all aspects of gallstone disease, from the epidemiology and pathogenesis to the complex management approaches required for some patients. The main emphasis is placed on effective diagnosis and treatment, making extensive use of practical case-based material while reviewing the guidelines in a multi-disciplinary manner. It is an essential read for all clinicians involved in managing patients with gallstone disease.

Here, Bullet Brian Turner 2014-09-01 Adding his

voice to the current debate about the US occupation of Iraq, in poems written in the tradition of such poets as Wilfred Owen, Yusef Komunyakaa (Dien Cai Dau), Bruce Weigl (Song of Napalm) and Alice James' own Doug Anderson (The Moon Reflected Fire), Iraqi war veteran Brian Turner writes power-fully affecting poetry of witness, exceptional for its beauty, honesty, and skill. Based on Turner's yearlong tour in Iraq as an infantry team leader, the poems offer gracefully rendered, unflinching description but, remarkably, leave the reader to draw conclusions or moral lessons. Here, *Bullet* is a must-read for

In the Lake of the Woods Tim O'Brien 2006-09-01

This riveting novel of love and mystery from the author of *The Things They Carried* examines the lasting impact of the twentieth century's legacy of violence and warfare, both at home and abroad. When long-hidden secrets about the atrocities he committed in Vietnam come to light, a candidate for the U.S. Senate retreats with his wife to a lakeside cabin in northern Minnesota. Within days of their arrival, his wife mysteriously vanishes into the watery wilderness.

Linguistic Communities and Migratory Processes

Karen P. Corrigan 2020-09-07 This interdisciplinary book is the first in an Irish context to address issues connected with the ‘super-diversifying’ of language and society engendered by recent and historical migrations. It analyses novel data from interviews with allochthonous and autochthonous groups of monolingual and plurilingual youngsters living in Northern Ireland. A key aim is to test models within second language acquisition and language variation and change research. Another goal is to examine the extent to which distinctive migratory trends

generated changes in the language ecologies of communities on the island of Ireland as well as globally in regions where the Irish settled intensively from the 1700s. The book also compares contemporary migratory experiences with historical records to further our understanding of the dynamics of identification through language across time. The first-ever book devoted to all aspects of the sociolinguistics of globalization and migration in Northern Ireland will be welcomed by scholars interested in the consequences for ethnolinguistic vitality of large-scale population movements. It could not be more

timely given the fact that 2.5 million sought asylum in Europe alone during 2016, greatly enhancing its diversity.
