Martin 2014-12-16 Alcohol consumption goes to the very roots of nearly all human societies. Different

countries and regions have become associated with different sorts of alcohol, for instance, the “beer culture” of Germany, the “wine culture” of France, Japan and saki, Russia and vodka, the Caribbean and rum, or the “moonshine culture” of Appalachia. Wine is used in religious rituals, and toasts are used to seal business deals or to celebrate marriages and state dinners. However, our relation with alcohol is one of love/hate. We also regulate it and tax it, we pass laws about when and where it’s appropriate, we crack down severely on drunk driving, and the United States and other countries tried the failed “Noble Experiment” of Prohibition. While there are many encyclopedias on alcohol, nearly all approach it as a substance of abuse, taking a clinical, medical

perspective (alcohol, alcoholism, and treatment). The SAGE Encyclopedia of Alcohol examines the history of alcohol worldwide and goes beyond the historical lens to examine alcohol as a cultural and social phenomenon, as well—both for good and for ill—from the earliest days of humankind.

*Moving Bodies, Navigating Conflict*  
Ahalya Satkunaratnam 2020-03-10  
Moving Bodies, Navigating Conflict is a groundbreaking ethnographic examination of dance practice in Colombo, Sri Lanka, during the civil war (1983–2009). It is the first book of scholarship on bharata natyam (a classical dance originating in India) in Sri Lanka, and the first on the role of this dance in the country's war. Focusing on women dancers, Ahalya Satkunaratnam shows how they navigated conditions of conflict and a neoliberal, global economy, resisted nationalism and militarism, and advocated for peace. Her

interdisciplinary methodology combines historical analysis, methods of dance studies, and dance ethnography.

*Wiki Works* Robert Maloy 2017-11-01

*Wiki Works in the History and Humanities Classroom* shows how teachers and students—working together as learning partners—can use interactive wiki technologies to transform the teaching of history and humanities topics through web-based research and inquiry-based learning.

*Affective Governmentality* Andrew Joseph Pereira 2019-07-01 This book investigates the subjectivities in education arising from the triumphant mobilisation of care as portrayed in educational advertisements, and provides a novel theory of affective governmentality based on empirical research on affect, neoliberalism,

and governmentality. It also takes the bold step of encouraging the re-imagination of the central and pressing question of school marketisation in Singapore, and problematises the seemingly innocuous portrayals of care in light of neoliberal governmentality seeking to perform cultural work on preferred identities and subjectivities. Using a judicious selection of media artefacts, the book scrutinises the creation of emotional technologies through an ethic of caring, harnessing vulnerabilities and triumphalism. As such it not only equips readers to understand the role of emotional technologies but also offers a critical and alternative view of hope and aspirations for transforming society.

**Introducing Vigilant Audiences** Daniel Trottier 2020-10-15 Ever since the exposure of the Kitten Killer of Hangzhou captured the imagination of online communities world-wide, vigilantism and digilantism has come

to the fore as an emerging and poignant issue. In their book *Introducing Vigilant Audiences* Daniel Trottier and colleagues (and contributors) have produced an excellent and thoughtful 'must read' for all who are studying vigilantism, or just interested in it. Prof. David Wall, University of Leeds This is a collection of cutting edge and thoughtful case studies of global digital vigilantism that advances this emerging and increasingly important field in useful and intriguing ways. Prof. Michael Pfeifer, City University of New York This ground-breaking collection of essays examines the scope and consequences of digital vigilantism – a phenomenon emerging on a global scale, which sees digital audiences using social platforms to shape

social and political life. Longstanding forms of moral scrutiny and justice seeking are disseminated through our contemporary media landscape, and researchers are increasingly recognising the significance of societal impacts effected by digital media. The authors engage with a range of cross-disciplinary perspectives in order to explore the actions of a vigilant digital audience – denunciation, shaming, doxing – and to consider the role of the press and other public figures in supporting or contesting these activities. In turn, the volume illuminates several tensions underlying these justice seeking activities – from their capacity to reproduce categorical forms of discrimination, to the diverse motivations of the wider audiences

who participate in vigilant denunciations. This timely volume presents thoughtful case studies drawn both from high-profile Anglo-American contexts, and from developments in regions that have received less coverage in English-language scholarship. It is distinctive in its focus on the contested boundary between policing and entertainment, and on the various contexts in which the desire to seek retribution converges with the desire to consume entertainment. Introducing *Vigilant Audiences* will be of great value to researchers and students of sociology, politics, criminology, critical security studies, and media and communication. It will be of further interest to those who wish to understand recent cases of citizen-led justice seeking in their global

context.

Ethical Practice of Social Media in

Public Relations Marcia W. DiStaso

2014-06-27 Given the high rate of social media use by the public, organizations are compelled to engage with key audiences through these outlets. Social media engagement requires organizations to actively participate with public groups, and this highly-interactive exchange raises a new set of ethical concerns for communicators. In this rapidly changing communications environment, the long-term implications of social media are uncertain, and this book provides the much needed research to understand its impact on audiences and organizations. Through an examination of a broad range of ethics concepts including transparency and online identities,

policies, corporate responsibility, and measurement, this book explores a variety of topics important to public relations such as diversity, non-profit communication, health communication, financial communication, public affairs, entertainment communication, environmental communication, crisis communication, and non-profit communication. The chapter authors, expert scholars within their fields of public relations, offer insights drawn from original research and case study examples of ethical dilemmas raised by social media communication.

*English Education in Oman* Rahma Al-Mahrooqi 2018-07-02 This book explores an area that has been somewhat overlooked in the literature to date – the current status and future trends of English education in Oman. It offers a variety of theoretical and methodological approaches to the subject and explores areas of English education in Oman that have, until now, been little investigated. It explores these issues from a variety of perspectives: the professionalization of English teachers in the country; the implementation of novel teaching

methodologies, curricula, and assessment approaches, into what are, in many ways, still very traditional education settings; the integration of learner identity into English language instruction; country- and culture-specific concerns with conducting research with Omani participants; the strategic demands of building stronger links between education and workforce needs; and developing learner autonomy and motivation.

**Formation and Early Growth of Business Webs** Florian Steiner

2006-03-30 Networks of firms have been in the focus of management research for several years. Recently, special attention has been paid to so-called business webs. Business webs are networks of firms which provide complements to a common product architecture. In the past, research focused on management issues of such webs but neglected the important question of how they

actually came into being. The present book explicitly examines the formation and early growth of business webs. The author illustrates the early growth phases with two in-depth cases of the formation of the wireless internet ecosystem i-mode and the leading person-to-person online auction platform eBay. The book uncovers the contingencies under which the establishment of business webs is likely to succeed. Business researchers will benefit from the theoretical framework, while interested business managers will find explanations and advice for establishing a business web.

*Women in the Crossfire* Robert Paul Churchill 2018-07-16 Every year, thousands of girls and women die at the hands of blood relatives. These victims are accused of committing

honor violations that bring shame upon their families: such 'transgressions' range from walking with a boy in their neighborhood to seeking to marry a man of their own choosing, to being a victim of rape. *Women in the Crossfire* presents a thorough examination of honor killing, an ages-old social practice through which women are trapped and subjected to terror and deadly violence as consequences of the evolution of dysfunctional patriarchal structures and competition among men for domination. To understand the practice of honor killing, its root causes, and possibilities for protection and prevention, Robert Paul Churchill considers the issues from a variety of perspectives: epistemic, anthropological, sociological,

cultural, ethical, historical, and psychological. He makes use of original research by analyzing a database of honor killing cases, published here for the first time. Specifically, *Women in the Crossfire* addresses the salient traits and trends present in honor killing incidents and examines how honor is understood in socio-cultural contexts where these killings occur. The book aims to illuminate causal pathways that combine to produce the tragedy of honor killing. Socialization within honor-shame cultures, factors such as gender construction, child-rearing practices, and adverse experiences prime boys and men to take roles as one-day killers of sisters, daughters, and wives in the name of honor. The book further relies on theories of cultural

evolution to explain how honor killing was an adaptation to specific ecological challenges and co-evolved with other patriarchic institutions. The ultimate aim of *Women in the Crossfire* is to convey promising methods of preventing future honor killings, and to protect girls and women from victimization.

Audience Genre Expectations in the Age of Digital Media Leo W. Jeffres  
2022-10-21 This volume bridges the divide between film and media studies scholarship by exploring audience expectations of film and TV genre in the age of digital streaming, using qualitative thematic and quantitative data-driven analyses. Through four ground-breaking surveys of audience members and content creators, the authors have empirically determined what audiences expect of various

genres, the extent to which these definitions match those of scholars and critics, and the overall variation and complexity of audience expectations in the age of media abundance. They also examine audience habits and preferences, drawing from both theory and original empirical analyses, with a view toward the implications for the moving image in a rapidly changing media environment. The book draws from the data to develop a number of new concepts, including genre repertoire, genre hybridity, audience interest maximization and variety seeking, and a new stage of genre development,

genre bending. An ideal resource for students and scholars interested in the symbiotic relationship between audiences and the moving image products they consume, as well as the way the current digital media environment has impacted our understanding of film and TV genres.
